Babel in Your Build

Craig D. McKeachie
DEVELOPER, TRAINER, AUTHOR

@cmckeachie   www.funnyant.com

Overview

Build Automation

- Npm scripts

- Gulp

- Grunt

Module Loaders

- Webpack

- Browserify

Frameworks

- React.js

Babel with npm Scripts

npm Scripts

Included in package.json

Like batch file or bash script

Run local node packages w/out path

Easy to learn

```
//package.json

"scripts": {
  "test": "echo \"Error: no test specified\" && exit 1"
}

$ npm run-script test
```

npm Scripts

```
$ npm run-script [script-name]
$ npm run [script-name]
```

npm Scripts

Shortcuts

```
$ npm run-script test
$ npm run test
$ npm test
```

npm Scripts

Shortcuts

Works for test, start, stop, restart

Babel with Gulp

Babel with Grunt

Babel with Webpack

Babel with Browserify

Babel with React
